

SÉNUVO BODY SIMs™ FOR RELAXATION

Encourage Rest and Sleep

According to Consumer Reports, 27% of people have trouble falling asleep most nights and 68% (164 million) people struggle with sleep at least once per week!¹ Roughly 60 million Americans suffer from sleep disorders, devastating their daily routines. Researchers show stress, long work hours and increased use of technology contributes to sleep problems. To compensate, one-third of people say they have tried medications to help them sleep. Americans spent \$41 billion on sleep aids in 2015 and the number is rising at an alarming rate. Yet reports show sleep aids have limited effectiveness and dangerous side effects.²

SÉNUVO BODY SIMs™ - THE FUTURE IN HEALTH AND WELLNESS

Sénuvo Body SIMs™ for Relaxation naturally encourage rest and sleep. Sénuvo Body SIMs use electromagnetic waves to safely stimulate acupoints that enhance the body's ability to heal itself. According to the University of Maryland Medical Center, acupuncture has a 90% success rate in helping with insomnia. Why? Acupuncture increases the amount of certain chemicals found naturally in the brain, such as serotonin, which promote relaxation and sleep.³

BENEFITS

- + ENCOURAGES REST AND SLEEP
- + HELPS REDUCE STRESS
- + PROMOTES RELAXATION
- + STIMULATES ACUPOINTS
- + NO DRUGS OR CHEMICALS
- + NON HABIT-FORMING

USAGE

Apply Sénuvo Body SIMs™ for Relaxation to the temple on each side of your head 15 minutes before going to bed. Remove in the morning.

"My son never slept, even as a newborn baby. If he napped 20 minutes, we were excited. When he was a toddler, it took up to three hours to get him to go to bed. He would cry and scream. He wouldn't lie down. The doctor didn't know why he wouldn't sleep. When my son was two years old, we tried the Sénuvo Body SIMs for Relaxation. Within 20 minutes, he was able to relax and lay down. Now we don't even try to put him to bed without the Sénuvo Body SIMs!"

THE POWER OF SÉNUVO BODY SIMs™

TESLA WAVES

Nikola Tesla was one of the most innovative scientists in history. His inventions include electric motors, Tesla coils and advancements in electricity, radio and remote controls. Tesla's research built a framework for modern day science. Tesla believed that everything in the Universe was made of waves of energy, frequency and vibration. At the time, no one believed Tesla but now science has proven him right. Just think about light waves, sound waves, radio waves, frequency and vibration.

“If you want to find the secrets of the Universe, think in terms of energy, frequency and vibration.”

- NIKOLA TESLA

THE MERIDIAN SYSTEM

Acupuncture is a Chinese healing technique that has been used for over 3,000 years. In 1997, the U.S. National Institute of Health recognized acupuncture as an effective treatment option for better health. Acupuncture improves the body's ability to heal itself by stimulating specific pressure points called acupoints. Acupoints are part of a complex network of electrical pathways known as the Meridian System. The Meridian System carries energy and information throughout the body. Injury, illness, stress, even pollution can obstruct these pathways, blocking the body's ability to heal and perform at its best. Acupoints can be stimulated with needles, pressure, heat and electrical stimulation, clearing pathways and improving overall health and wellness.

SÉNUVO BODY SIMs

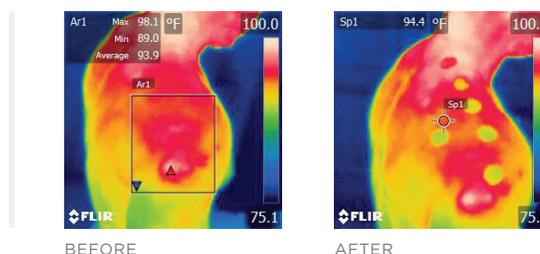

Today, scientists understand that waves or frequencies affect the human body. For example, sunlight causes the human body to naturally produce vitamin D. Using cutting-edge research, Sénuvo Body SIMs™ (Synergy Infused Modulator) store electromagnetic waves with specific frequencies to produce a desired effect within the human body. Body SIMs safely stimulate acupoints. They are drug-free, chemical-free, and non-habit forming. Body SIMs are safe because they don't interact with medications, supplements or health concerns. Sénuvo Body SIMs are easy to use, produce quick results, and have no side effects. The medical grade adhesives used are hypoallergenic and won't irritate sensitive skin.
